M... My
recomendation
is...

ubunchu!

It is very
popular with
the users,
and it is the
hottest desktop
Linux distribution
available.

Isn't it Ubuntu not Ubunchu?

No Way!

Stop
messing
around!

It can't be
any good!

**Stop talking
at the same
time!**

Wait, just
give me a
second and
hear me
out.

No Youtube!

Inferior Product!

It sounds ok at first, but it's really Linux. You can't even watch online videos.

The Command Line

Rocks!

The desktop is not required for Linux and Youtube is a waste of a computer!

The Beast!

Well we spent all our money on this awesome Quad Core Computer.

What OS will it be running?

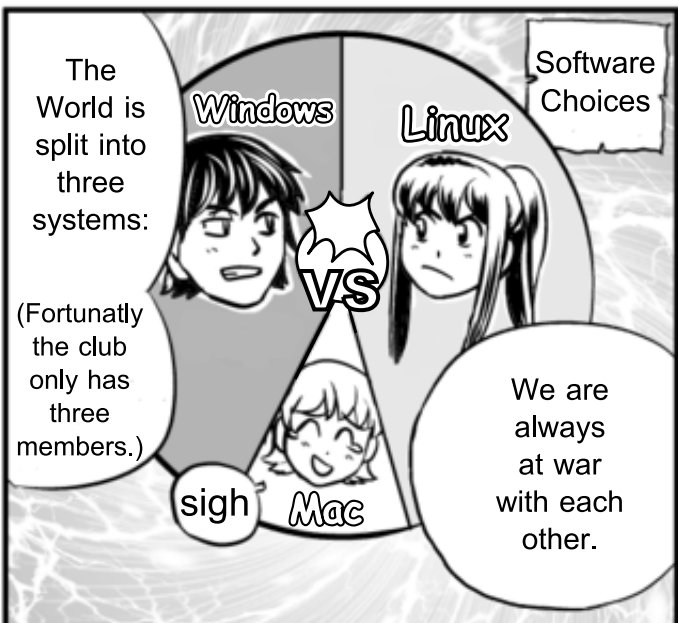

Windows XP!

Slackware!

Nothing is as good!

I'll fight you for the OS!

As you can see, it's a mess here at the sys-admin club.

Software Choices

The World is split into three systems:

Windows

Linux

VS

sigh

Mac

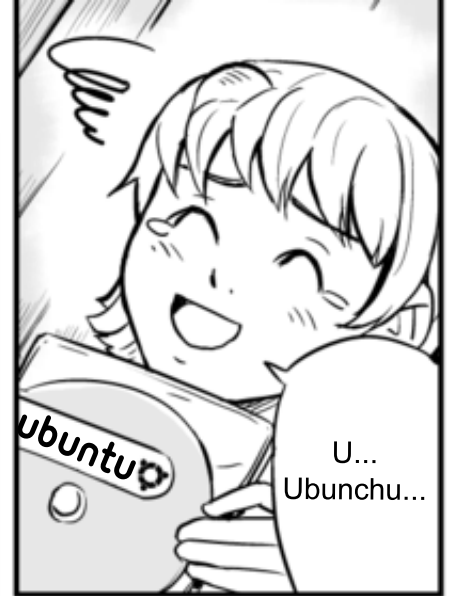

(Fortunately the club only has three members.)

We are always at war with each other.

Ouch!

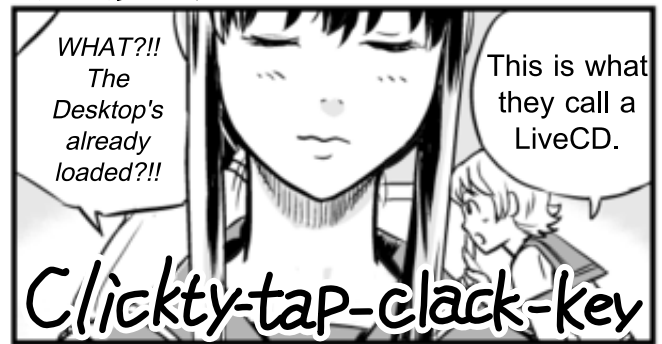

I have tried to solve this situ...

Again, not "Ubunchu" but Ubuntu

See? It's Ubuntu, not "Ubunchu".

You don't use a desktop, do you.

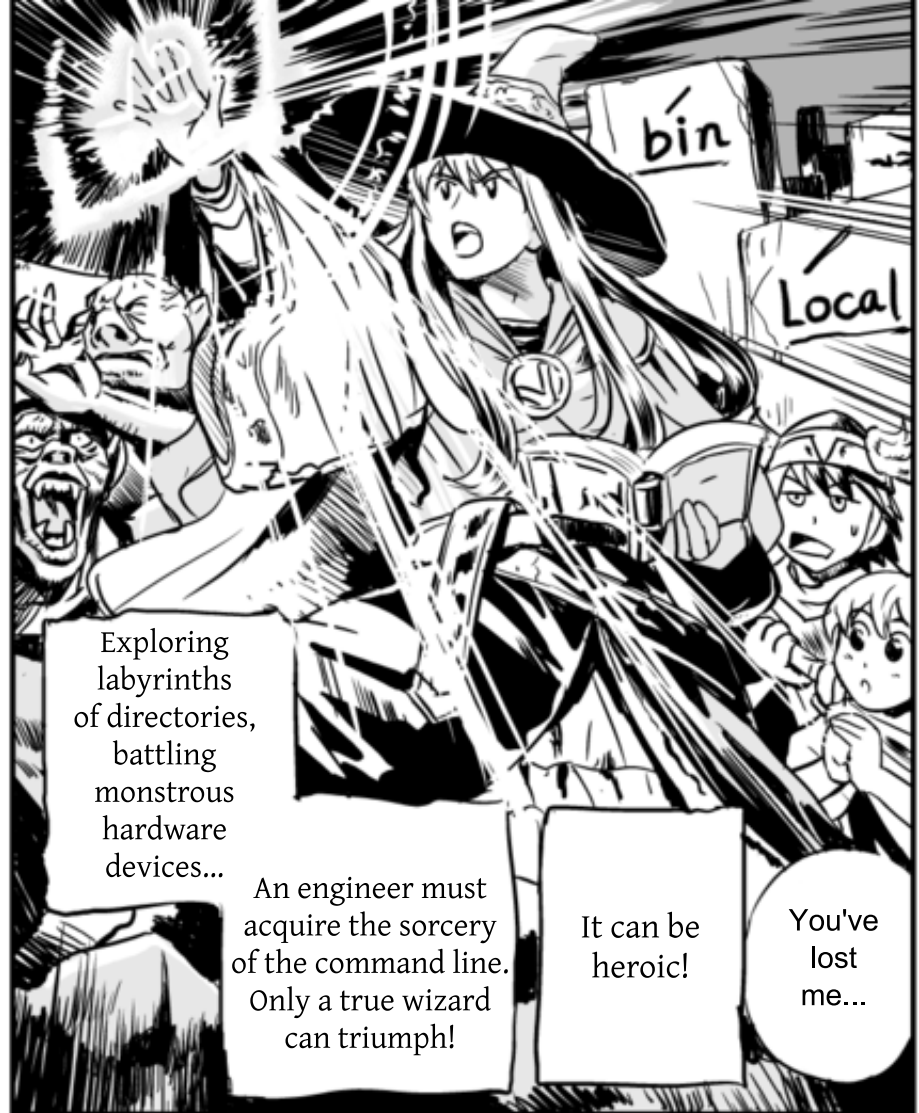

Pft, enjoy your childish text based computer by yourself.

Huh?

Installing Linux...

Is **NOT** that easy!

Exploring labyrinths of directories, battling monstrous hardware devices...

An engineer must acquire the sorcery of the command line. Only a true wizard can triumph!

It can be heroic!

You've lost me...

But what do you know,

You've wasted your time on Windows, and now it's too late for you.

BEEP

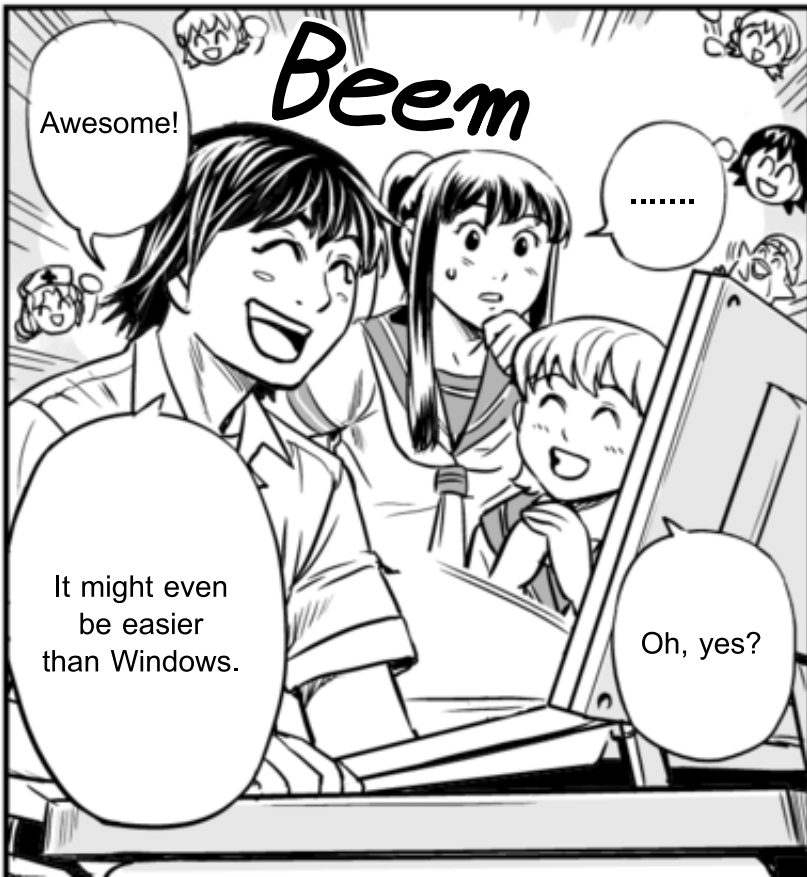

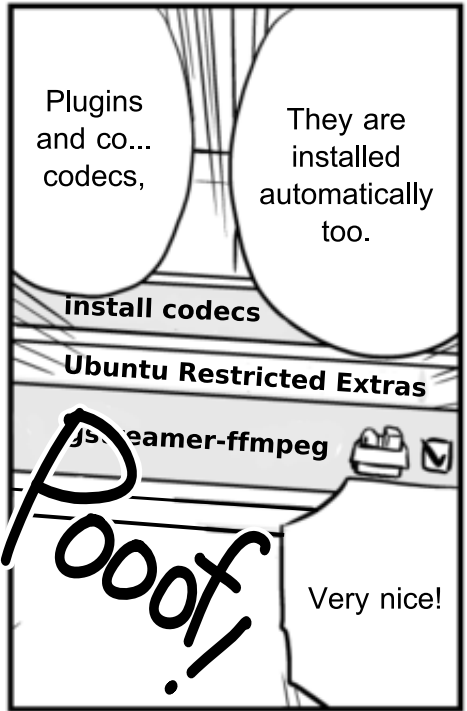

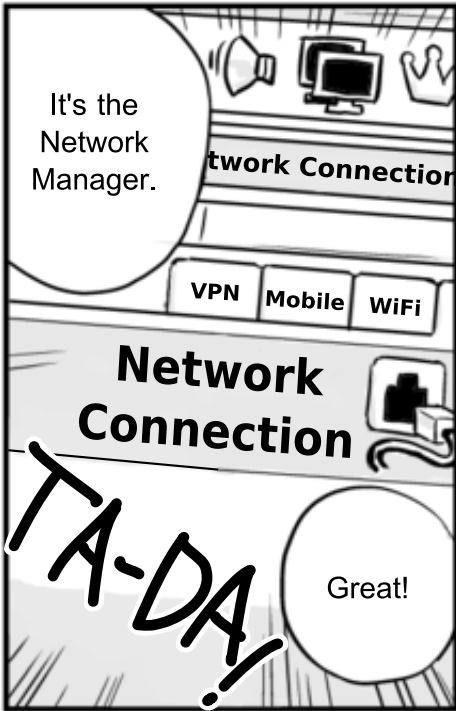

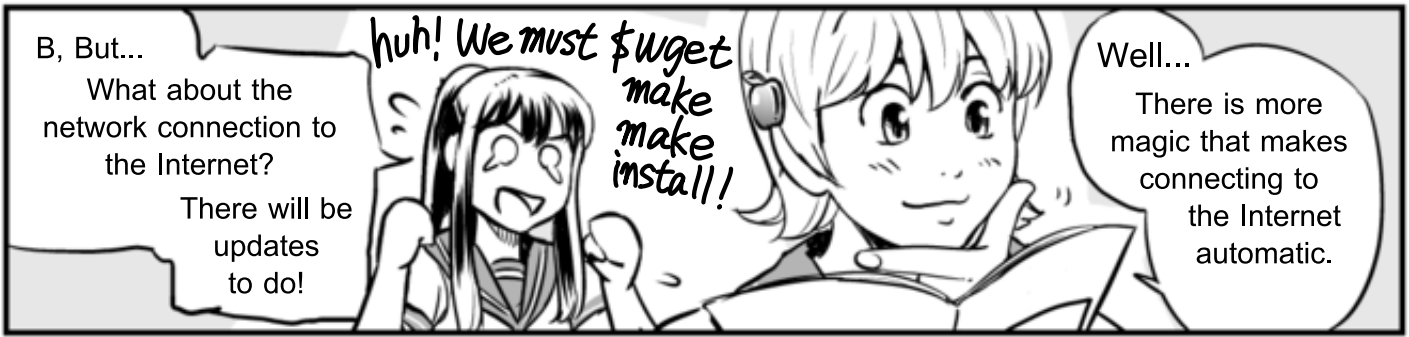

Good, the installation has completed!

Wait, what! Already?

W..What sorcery did you use?

The... magic of click forward, click forward, & click finish?

The command line?
That's just a relic
of the old world.

OW!

One only really useful
in museums and
stuff old Unix labs.

No!

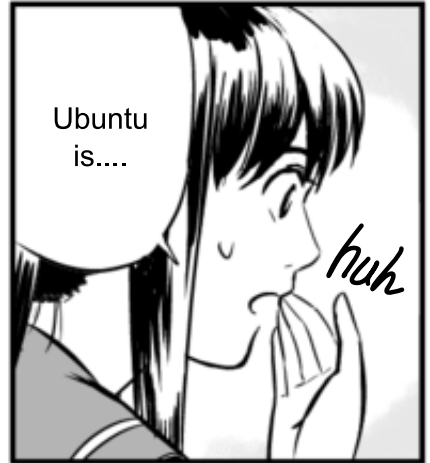

Absolutely
No!

The terminal is
important for
system
maintenance.

The package manager
is just complicating
the system.

This
seems like
nothing
more
than a bad
copy of
Windows!

Ubuntu
is....

huh

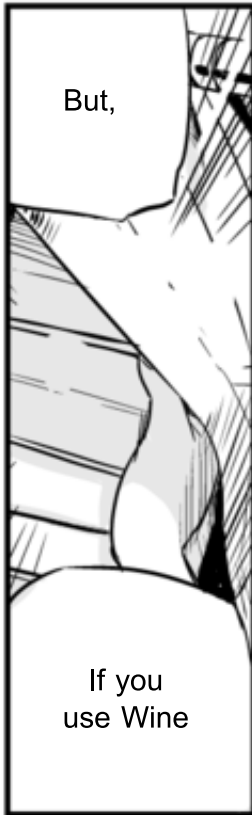

Akane's right.

Ubuntu is just Linux!
I still can't play games
and the programs
I use in Windows.

Pff!

Oh?

But,

If you use Wine

It is likely to be able to play...

Any of your sexy, Anime Girl Games!

These are a secret!

Egh!

Don't you have any normal games?

and...

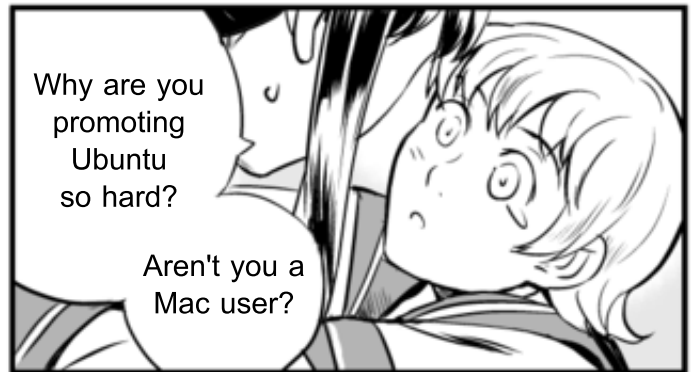

It has long term support, it's easy and stable...

Akane, who wouldn't like a server like that!?

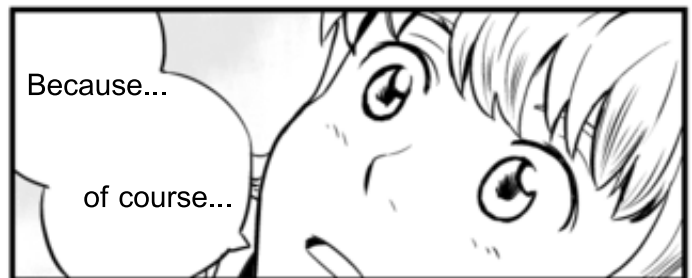

Risa, Why...

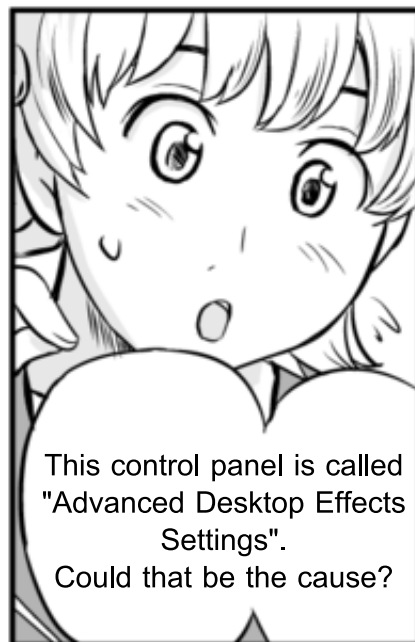

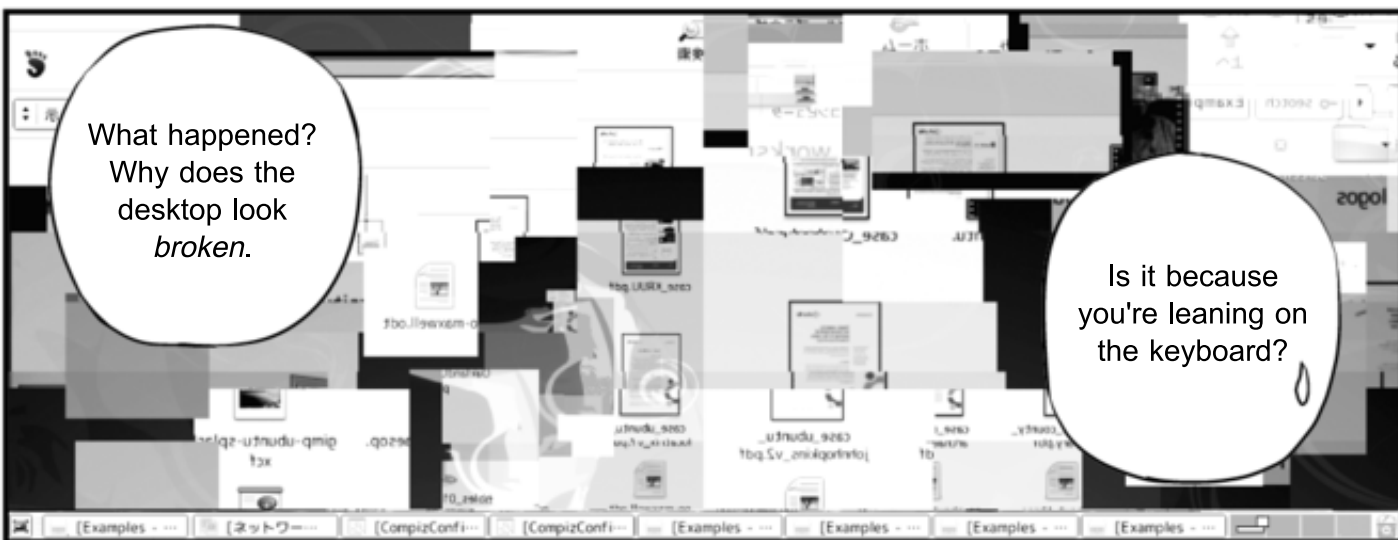

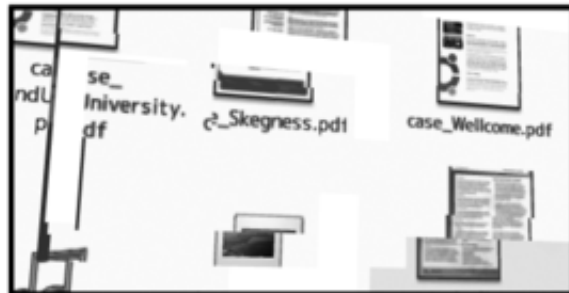

Why are you promoting Ubuntu so hard?

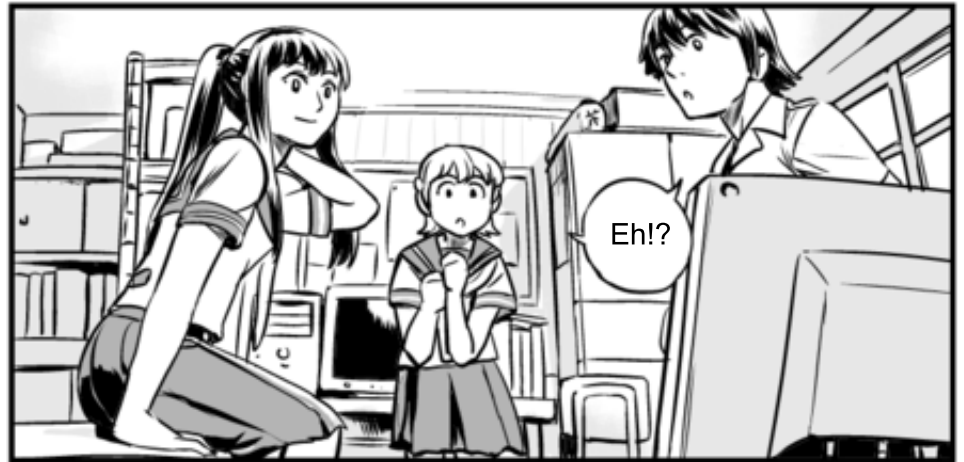

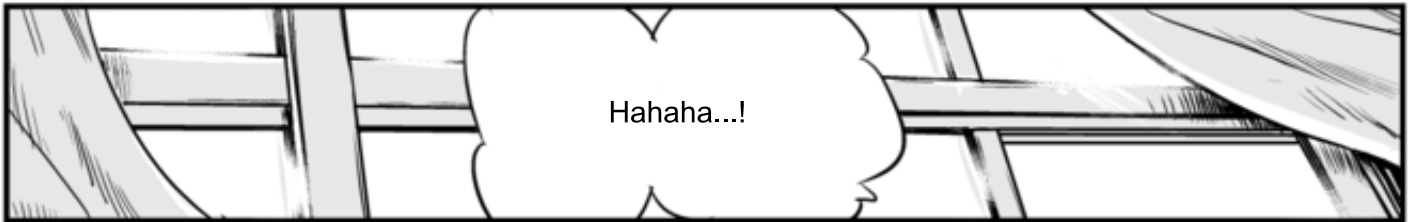

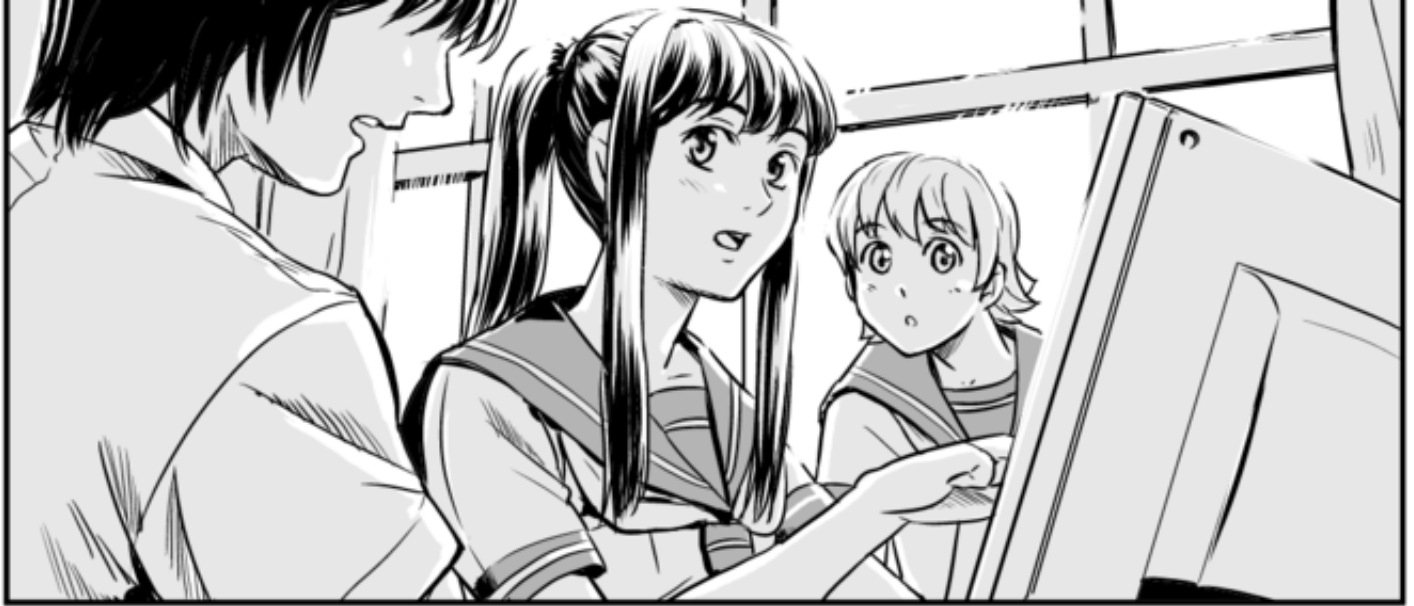

Aren't you a Mac user?

Because...

of course...

This is...

A joy to work with!

Could it be?

I Agree!

Truce?

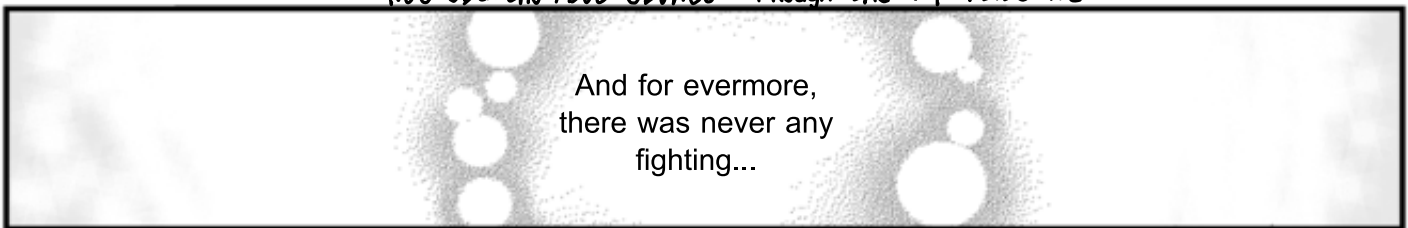

"Ubunchu" does mean...

"Humanity towards others"...

On a Temporary Basis.

And, "I am because of my community".

Not "Ubunchu", but "Ubuntu" Though she is persistent

And for evermore,
there was never any
fighting...

Don't install weird games!

I haven't finished installing it yet!

Please stop fighting!

THE END
